PROFILE

I create websites and web applications using technologies such as Javascript: JQuery, AngularJS, ReactJS, HTML5, CSS3, PHP7, Node.js and Python. While I have a foundational knowledge of C#/C++, I really enjoy open source technologies. I also have experience with AWS, Docker and DigitalOcean. My expertise lies within the LAMP/MEAN stack but I can assist with native software development. My QA experience is with Codeception, PHPUnit and Angular's Protractor and Karma - creating automated End To End / Unit tests.

I have been tinkering with programming and the web since I was a kid - my heart lies in full stack web development and not just front end or back end. I have a BFA in Graphic Design and an AA in Application Development. I will code the full stack: mockups and designs, front-end, back-end (apis and middleware) and even help manage linux servers. I am used to wearing multiple hats but I would like to work in an environment where I can collaborate with other IT professionals and developers. I am always happy to create a sample application to showcase my abilities.

I really want to get into a more devops focused role. I have experience with Jenkins, TravisCI, Docker and DockerHub. My ideal CI/CD pipeline would include browserstack device integrated E2E/Unit tests. While I have helped enhance my previous companies CI/CD workflow, I have not fully created one from the ground up and would love the opportunity to help stage one.

WORK EXPERIENCE

Web Application Developer 02/2017 - present (MEAN)

Quorum Review - Independent Review Board, Seattle, Washington

At my current job, I am responsible for developing, implementing and maintaining business functionality for business users and external clients in a fast paced environment. I collaborate with technical and business staff in the design, development, testing, implementation and production support of enterprise applications. We primarily use C#/MEAN Stack.

Web Application Developer 12/2015 - 02/2017 (LAMP)

Bio-Tech Medical Software Inc., Olympia, United States

WORK EXPERIENCE

At BT, I was a Full Stack Web Developer working on PHP, JQuery, AngularJS, Python and Perl based services and applications. Some of my applications include: Digital menuboard, mobile/desktop business dashboards, online jQuery menu plugins, web services. Like some of my other positions, I was responsible for everything from initial PSD mockup designs to back-end code.

In addition to handling the development of BTMenu products, I also managed the Debian linux servers and occasionally assisted our core development team with pc-native application development.

Web Application Developer 05/2014 - 01/2015 (LAMP)

Technijian Inc, Irvine, United States

Front-end development with HTML, CSS, JQuery and AJAX, back-end development with PHP, database Administration: MySQL/Postgres and Tier 3 support for stakeholders and designated end users.

My most proud work at Technijian was an application for Ultimate Fighting Championship (UFC). I worked with a team of 3 developers in a LAMP stack environment. We worked with PHP, JQuery, HTML5 and CSS3. Our development methodology was agile-based with weekly sprints.

Web Application Developer 01/2015 - present (LAMP)

Fitted Technology, Irvine, United States

Fitted Tech is a sole proprietorship which offered web development, application development, graphic design and search engine optimization services.

Web Design Intern 12/2013 - 05/2014

Third Stone Media, Irvine, United States

Design mockups (PSD format), content management / creation, Wordpress theme customization

TSM provided me with an internship where I found my passion for programming and web development. Third Stone Media offers websites and graphic design branding packages.

IT Help Desk 01/2014 - 05/2015

Concordia University: Irvine, Irvine, United States

WORK EXPERIENCE

Provided tier-1 technical assistance to computer users by resolving computer problems concerning hardware and software and troubleshooting for Mac's, PC's and peripheral hardware.

EDUCATION

High School Diploma 2008 – 2011
Eastside Catholic, Sammamish, United States

Graphic Design: UI 2011 – 2015
Concordia University: Irvine, Irvine, United States

Concordia has the distinctive 'Core Curriculum Program', which is comprised of classic liberal arts courses offered in small, innovative learning communities. For example, courses are taken together in linked pairs: biology with theology, mathematics with philosophy, and history with literature. In a recent survey of core liberal arts curricula at over 1,000 universities, the American Council of Trustees and Alumni rated just 19 colleges higher than Concordia. received a higher rating than numerous elite private and public universities like Harvard, Westmont, and the University of California—Irvine.

During my time at Concordia, I spent my down time studying web and application development and was also a student athlete in the rugby program.

Application Development 2015 – 2016
Lake Washington Institute Of Technology, Kirkland, United States

The Information Technology Applications Development program is designed to prepare professionals to work as web developers or software engineers within an organization using industry standard techniques. Students will acquire the skills to design, code, implement, and maintain programs and database systems that provide computer-based solutions to business problems in an efficient manner. The Information Technology Applications Development degree program offers the students an opportunity to further develop skills in greater depth versus establishing new skills.

During my time at the program, I worked full time at Bio-Tech Medical Software. In addition, I am proud to say that I was part of the Deans list while attending LWTech.

SKILLS

Development

Languages

PHP7	Full
Javascript	Full
HTML5	Full
CSS3	Full
Node.JS	Full
Python	Professional
C++/C#	Experienced

Libraries/Frameworks/Services
